ASHISH DIXIT

PRODUCT DESIGNER | UX / UI DESIGNER

+1 (312) 818-0637 | design.ashishd@gmail.com | LinkedIn | Portfolio

SUMMARY

Product Designer with 7+ years of experience designing intuitive, scalable, and user-centered digital products across web, mobile, desktop, and tablet platforms. Skilled in end-to-end product design, UX research, interaction design, information architecture, prototyping, usability testing, visual design, and design systems. Experienced in B2B SaaS, enterprise applications, CAD and engineering software, analytics dashboards, workflow optimization, and AI-powered experiences. Proficient in translating complex user needs and business requirements into accessible, high-fidelity product experiences while collaborating with product managers, engineers, and cross-functional stakeholders to improve usability, product adoption, and design-to-development efficiency.

PROFESSIONAL EXPERIENCE

PRODUCT DESIGNER | **Dassault Systems** | **USA** **May 2025 – Present**

- Parametric Modeling & Sketcher UX: Redesigned feature-history tree interactions, including reordering, suppression, rollback, and error recovery, while improving constraint and dimension feedback to reduce rebuild diagnosis time by 25% and over-constrained sketch errors by 20% in usability testing.
- AI-Assisted Command Discovery: Architected AI-assisted command search and context-aware toolbars that surfaced relevant tools based on user selections, reducing average clicks per task by 30% in prototype evaluations.
- Architectural Workflows: Structured parameter controls for massing, façade panels, and section/elevation features, enabling architects to explore design variations without scripting.
- Collaboration & Design Review: Defined browser-based review experiences with 3D markup, threaded geometry comments, and version comparison, alongside a read-only mobile viewer for site visits and client reviews.
- Onboarding & Product Adoption: Led onboarding design for a cloud CAD offering, introducing interactive tutorials and template projects to improve first-week user activation by 15%.
- Design Systems & Interaction: Extended design systems for complex professional interfaces with reusable iconography, panel patterns, keyboard shortcuts, dark-mode contrast standards, and micro-interactions for selection, snapping, and transform handles.
- UX Research & Product Strategy: Conducted user interviews and remote usability testing with architects, product engineers, and manufacturing professionals, translating insights into actionable design recommendations and collaborating with product managers on feature prioritization.

UI/UX DESIGNER | **Altair** | **USA** **Sep 2024 – Dec 2024**

- Topology Optimization UX: Redesigned the setup workflow for loads, constraints, materials, and design space, reducing setup errors by 25% during usability testing with structural and mechanical engineers.
- Simulation Results Visualization: Built stress heatmaps, deformation playback, and side-by-side design comparisons to help non-specialist designers interpret simulation results with less reliance on dedicated analysts.
- 3D Interaction Design: Prototyped direct-manipulation interactions for placing loads and supports on 3D geometry, incorporating snapping, hover previews, contextual feedback, and undo-safe editing.
- Research & Guided Onboarding: Conducted contextual interviews with engineers and architects using simulation during early-stage design and translated research findings into a guided first-simulation onboarding experience.
- Command Architecture: Audited ribbon navigation and command structures across multiple tools, proposing task-based groupings that the product team incorporated into its roadmap.

UI/UX DESIGNER | **Infosys** | **IND** **Jun 2020 – Nov 2022**

- Designed user-centered digital experiences for enterprise, financial services, customer-facing, analytics, supply-chain, and internal business applications, translating business requirements into scalable UX solutions.
- Conducted user interviews, contextual inquiry, usability testing, heuristic evaluations, stakeholder workshops, and competitive research to identify usability improvements and product opportunities.
- Translated research and requirements into personas, journey maps, information architecture, task flows, wireframes, prototypes, high-fidelity interfaces, and design specifications.
- Identified and prioritized 110+ usability and experience issues and created a 70+ component design system using Figma and Adobe XD to improve consistency, accessibility, and design-to-development efficiency.
- Collaborated with product managers, developers, QA teams, and stakeholders across Agile sprints, Jira workflows, design reviews, developer handoff, implementation, analytics reviews, release validation.

UI/UX DESIGNER | **Tata Consultancy Services (TCS)** | **IND** **Dec 2017 – May 2020**

- Designed responsive websites, mobile applications, customer portals, internal tools, and enterprise interfaces for clients across banking, insurance, retail, and business domains.
- Conducted user research, customer interviews, contextual inquiries, competitor analysis, and workflow assessments to understand user needs, business requirements, and product opportunities.
- Created personas, journey maps, information architecture, user flows, wireframes, prototypes, and high-fidelity UI designs for web and mobile experiences.
- Designed and simplified customer onboarding, claims, account management, transaction, service, and operational workflows through improved navigation, forms, content hierarchy, and interaction\ patterns.

PROJECTS

Atelier (B2B SaaS / Practice Management Platform for Architects)

- Architected the end-to-end UX for a B2B SaaS practice-management platform, covering product discovery, information architecture, and high-fidelity Figma interfaces.
- Defined MVP scope across 6 core modules through competitive analysis and practitioner interviews, establishing a
- scalable design system with 50+ reusable components and documented interaction patterns.

- Developed a functional prototype in React and Next.js, validating responsive layouts and design-to-development parity across desktop and tablet breakpoints.

Enterprise Analytics Dashboard Redesign (B2B SaaS / FinOps Platform)

- Revamped a FinOps dashboard to simplify cost and usage workflows across three user roles and 4K+ enterprise users.
- Translated interview, usability-testing, and Google Analytics insights into streamlined reporting workflows across 12 flows.

Accessibility-First Mobile Product Redesign (Consumer Application)

- Led an end-to-end mobile product overhaul using WCAG 2.1 and inclusive design principles across 20+ user journeys.
- Organised usability-testing and accessibility-audit findings into a design system to support consistent implementation across 8 feature releases.

TECHNICAL SKILLS

- **Product Design & UX/UI:** Product Design, User-Centered Design, Interaction Design, Visual Design, Information Architecture, Workflow Optimization, Responsive Design, Cross-Platform UX, End-to-End Product Design, Design Specifications
- **UX Research & Strategy:** User Interviews, Contextual Inquiry, Usability Testing, Heuristic Evaluation, Competitive Analysis, Research Synthesis, Persona Development, Customer Journey Mapping, Task Flows, Jobs-to-Be-Done (JTBD), Product Discovery, MVP Scoping, Feature Prioritization
- **Prototyping & Design Systems:** Low- and High-Fidelity Wireframes, Interactive Prototyping, Design Systems, Component Libraries, Design Tokens, Reusable UI Patterns, Micro-Interactions, Interaction States, Developer Handoff, Design-to-Development Collaboration
- **Enterprise & Technical Product UX:** B2B SaaS, Enterprise Applications, CAD and 3D Modeling Workflows, Engineering and Simulation Interfaces, Analytics Dashboards, Data Visualization, Workflow Automation, AI-Assisted Experiences, Cloud Applications, Complex Data-Driven Interfaces
- **Accessibility & Inclusive Design:** WCAG 2.1 AA, Accessibility Audits, Inclusive Design, Keyboard Navigation, Color Contrast, Accessible UI Patterns, Assistive Technology Considerations
- **Design & Research Tools:** Figma, FigJam, Adobe XD, Framer, Axure RP, Balsamiq, Sketch, Miro, Maze, UserTesting, Optimal Workshop, Adobe Creative Suite
- **Analytics, Development & Collaboration:** Google Analytics, Microsoft Clarity, Tableau, Storybook, React, Next.js, TypeScript, HTML5, CSS3, JavaScript (Basic), REST/GraphQL APIs, Jira, Agile/Scrum, Stakeholder Management, Cross-Functional Collaboration

EDUCATION

Master's in Human-Computer Interaction | DePaul University | Chicago, IL — Jan 2023 – Mar 2025
Bachelor's in Architecture | Savitribai Phule Pune University | India — Sep 2011 – Oct 2016
