SUMMARY

UI/UX and Product Designer with **6+ years of experience** delivering **enterprise** and **data-driven digital products** across insurance, marketing technology, and global platforms. **Human-centered design**, **WCAG 2.1** accessibility, and scalable design systems, translating user research and behavioral analytics into production-ready interfaces using **Figma**, **Adobe Creative Suite**, **React**, and **TypeScript**. Partners closely with **product**, **engineering**, and analytics teams to define requirements, prioritize roadmaps, and **deliver 20+ internal tools**, customer-facing platforms, and large-scale dashboards.

PROFESSIONAL EXPERIENCE

PRODUCT DESIGNER | Liberty Mutual | USA

May 2025 – Present

- Engineered end-to-end experiences for enterprise policy and claims platforms using **Figma and Adobe**, simplifying 18 multi-step workflows used by 45K+ users.
- Defined product requirements and success metrics by aligning stakeholders and engineering, prioritizing roadmaps and guiding delivery for **10+ enterprise features**.
- Orchestrated **WCAG 2.1** accessibility updates, coordinating audits and refining **React** components to bring 12 regulated products into compliance.
- Leveraged behavioral analytics from Google Analytics and Microsoft Clarity to refine 40+ screens, reducing task completion time to 2.6 seconds across **TypeScript-based** applications.
- Aligned design-to-development handoff through annotated **Figma** libraries and Storybook components across 9 scrum teams and 4 release cycles.
- Refined responsive dashboards with grid systems and adaptive breakpoints, stabilizing experiences for 25K+ tablet and mobile users within **React and TypeScript** environments.

UI/UX DESIGNER | Epsilon | USA

September 2024 – December 2024

- Translated insights from 22 stakeholder interviews into interaction models using Design Thinking and Jobs-to-Be-Done, defining product opportunities.
- Validated marketing platform concepts via **Maze** and **UserTesting**, executing 48 usability scenarios to reduce workflow friction in segmentation and campaign configuration.
- Synthesized qualitative research and product usage signals to drive UI and interaction decisions, informing redesigns of personalization dashboards for 14 client-facing teams.
- Produced high-fidelity UI assets and interactive **Framer prototypes** aligned with enterprise design systems, enabling implementation across 6 Agile sprints.

UI/UX DESIGNER | Dell Technologies | IN

June 2020 – November 2022

- Revitalized internal enterprise platforms using Human-Centered Design and Information Architecture, restructuring navigation for 80K+ global employees.
- Conducted usability tests and heuristic evaluations, identifying 110+ actionable findings added to release backlogs.
- Instituted scalable design systems in **Figma** and **Adobe XD**, introducing 70+ reusable components across 9 product lines and regional teams.
- Mapped user journeys and service blueprints for supply chain and analytics tools, aligning **UX** with governance requirements.
- Integrated accessibility-first UI patterns, enabling assistive technology compatibility across 15 internal applications.
- Collaborated with frontend engineers to maintain visual parity, reducing **UI** discrepancies across 6 coordinated release cycles.

UI/UX DESIGNER | Robosoft Technologies | IN

December 2017 – May 2020

- Crafted responsive web and mobile interfaces for 8 client-facing products in fintech and consumer domains.
- Facilitated user interviews and contextual inquiries, translating findings into personas and task flows for 30+ core features.
- Developed wireframes, low-fidelity mockups, and interactive prototypes using **Axure RP** and **Balsamiq**, streamlining stakeholder decision-making across 12 design reviews.
- Enhanced over 15 microinteractions and motion with **Framer** and **Jitter**, improving key application flows.
- Coordinated 5+ **Agile** delivery rituals per week via **Jira** and **Azure DevOps**, ensuring alignment throughout planning, execution, and backlog grooming.
- Formalized 10+ UX standards, interaction guidelines, and UI specs, enabling consistent implementation across distributed teams.

PROJECTS

Enterprise Analytics Dashboard Redesign (B2B SaaS / FinOps Platform)

- Redesigned an enterprise analytics dashboard using **Figma** and **FigJam**, simplifying complex cost and usage workflows across 3 user roles for 4K+ enterprise users.
- Assessed interaction patterns through interviews, usability testing, and **Google Analytics**, reducing steps across 12 reporting flows and improving workflow consistency.

Accessibility-First Mobile Product Redesign (Consumer Application)

- Led end-to-end redesign using **WCAG 2.1** and inclusive design, improving assistive-technology compatibility across 20+ user journeys.
- Synthesized usability testing and accessibility audits into a refined design system, enabling consistent implementation across 8 feature releases.

SKILLS

UX / Product Design: Human-Centered Design, Interaction Design, Information Architecture, Design Systems, Microinteractions, User & Task Flows, Content Strategy, Developer Handoff, Responsive & Cross-Platform Design, Modular Component Design

UX Research & Strategy: User Research, Usability Testing, A/B Testing, Heuristic Evaluation, Interviews, Contextual Inquiry, Persona Development, Journey Mapping, Jobs-to-Be-Done, Competitive Analysis, Research Synthesis, Behavioral & Clickstream Analytics, Conversion Optimization

Product Management & Delivery: Product Strategy, Product Discovery, Roadmapping & Prioritization, PRDs & User Stories, Backlog Grooming, MVP Scoping, Stakeholder Management, Cross-Functional Leadership, OKRs & Success Metrics, Release Planning, Risk & Tradeoffs

Accessibility & Inclusive Design: WCAG 2.1 Compliance, Accessible UI Patterns, Assistive Tech Integration, Inclusive Design Principles, Accessibility Audits, Keyboard-Friendly Interactions

Frontend Development / Dev Familiarity: React, TypeScript, HTML5, CSS3, Basic JavaScript, REST & GraphQL APIs, Lazy Loading, Code Splitting, Core Web Vitals

Design & Collaboration Tools: Figma, FigJam, Adobe XD, Creative Suite, Framer, Axure RP, Sketch, Miro, Maze, Optimal Workshop, UserTesting, Jira, Asana, Notion, Azure DevOps

Analytics & Visualization: Google Analytics, Microsoft Clarity, Tableau, A/B Testing Analysis

3D & Visualization: Fusion 360, Rhino, SketchUp, Revit, Lumion, Bambu Studio

EDUCATION

Master's in Human-Computer Interaction | DePaul University | Chicago, IL
Bachelor's in Architecture | Savitribai Phule Pune University | India

January 2023 – March 2025
September 2011 – October 2016
